

## Signpole and Signpost Profiles

Signpole single slot and Signpole adjacent slot creating a 90° angle sign

▲ Signpole 80 and Signpost 80 variations

Free standing single / multipanel signs

Wayfinding / directional / identification

### Infopanel Signpole and Signpost Profiles

The Infopanel interior and exterior system is simple to use, yet so versatile.

Signpole (round poles) and Signpost (square posts) extrusion profiles are engineered for design flexibility and ease of use with the Spandex Infopanel range of extruded aluminium panels and non-standard size fabricated panels.

Signpole and Signpost extrusions are available in:

- diameters of 55mm, 80mm and 140mm.  
(Signpost available in 55mm and 80mm only)
- 6030mm lengths that can be cut to exact requirements, minimising waste
- standard mill finish – ready for painting to specified colour requirements  
– or in standard black or white powder coat finish\*

Signpoles and Signposts can be finished off with a range of flat plastic, flat 2mm aluminium or cast aluminium caps and corners.

\* Painted powder coat finishes are available in black (RAL 9005) and white (RAL9016) 75% eggshell as standard.

Infopanel is the preferred choice  
of architects, designers and signmakers worldwide
